BIRTHDAY DINNER FOR DR. M. J. LEWI

A DINNER commemorating the ninety-first birthday of Dr. Maurice J. Lewi, President of L.I.U. College of Podiatry, was held on December 1, 1948. A large number of his friends attended this event which was conducted under the Chairmanship of Dr. Tristram W. Metcalfe, President of L.I.U.

NARCOTICS BUREAU TO DISTRIBUTE NEW ORDER FORM

THE Bureau of Narcotics will shortly begin distribution of its revised narcotics order form. The most important new feature is the provision of an extra copy which is to be filled out by the ordering practitioner to be forwarded by the wholesaler to the Bureau of Narcotics' supervisor in the district where the doctor practices. According to Commissioner Anslinger, this extra copy will result not only in lightening the wholesaler's paper work burden, but it will also shorten considerably the time it now takes Federal agents to catch up with law-breaking practitioners.

NEW FUNGICIDE

PROPYLENE glycol dipropionate cures a number of common fungous infections of the skin. For dermatophytosis of the feet, Eugene S. Gereston, M.D., of the University of Maryland, Baltimore, applies the pure concentrated compound twice daily with cotton-tipped sticks. Among 340 camp children infected with epidermophyton, microsporon, and various types of trichophyton, most of the acute and subacute and some chronic lesions were healed in one to three weeks after application.
